On the Web

After you have **Font Awesome set up in your web project**, you can copy any icon's name here and paste it into our **standard markup**. Using **CSS pseudo-elements**? Copy and paste the unicode value into your specific CSS rule.

On the Desktop

After you have **Font Awesome set up on the desktop**, you can copy any icon's name here and paste it into a text field and let **ligatures** do the rest of the work (when supported by your desktop app). Or you can also copy and paste the icon (not the unicode) directly from this page into a text layer as a **glyph**.

Regular Icons in Font Awesome Free?

In order to make **upgrading from Font Awesome 4 to 5** smoother for existing projects, we've bundled regular style icons that better match the previous versions appearance in free.
