Flexbox vs. Grid

Learn the similarities and differences between flexbox and CSS Grid so you know what to use and when.

CSS grid vs. Flexbox: Webflow layout tutorial

▶

View all lessons →

The similarities and differences between the tools — what to use and when.

In this lesson:

Try

2   Grid strengths

3   But which should I use — Flexbox or Grid?

Flexbox strengths

1   Layout control in 1-dimension, vertically *or* horizontally

2   Adjust justification and alignment

3   Override alignment for child element settings

Grid strengths

1   Layout control in 2-dimension, vertically *and* horizontally

2   Organize elements anywhere inside grid cells

3   Adjust positioning

4   Override alignment on child element settings

But which should I use — Flexbox or Grid?

1	Grid is great If you can break your design into a grid
2	Flexbox is great if your design spans either horizontally or vertically
3	Grid allows for breakpoints in responsive design
4	Grid and Flexbox are both excellent tools
5	Pick the tools that best suit what you're trying to build

For more on Grid, check out Grid 2.0 layouts in Webflow.
